

Team Chill Meeting Agenda/Minutes:

1. Comments from TAs
 - Feedback from DNJ: Very useful idea. AirB&B for storage. Insurance? Implementation risk is a design issue.
 - Product Feature Question: how to avoid having dead body/bomb type stuff from being stored?
 - Seller has right to search through buyer's things
 - Show use cases in final demo? Real buyers and sellers connected
2. Last meeting's action items
 - None
3. Progress report
 - Frontend
 - Backend
4. Design updates
 - Frontend
 - Backbone, unit testing with backbone unit testing framework
 - Search/Notifications with Ajax?
 - Look into AirBnB Render for our own site
 1. <http://nerds.airbnb.com/weve-open-sourced-rendr>
 - Backend
 - All will come up with API
 1. stripe
 2. google maps api
 3. sendgrid
